

DADI MUKESH

FULL STACK DEVELOPER

Visakhapatnam | dadimukesh0000@gmail.com | 7989011283

SUMMARY

Full Stack Developer with 2+ years of experience building production-grade ERP applications. Delivered 25+ reusable React components and 6+ ERP modules (Procurement, Production, Logistics, Finance, Sales) using React.js, TypeScript, NestJS, Node.js , and MySQL. Reduced API response times through database optimization and contributed to real-time workflow management systems used in live business operations.

TECHNICAL SKILLS

- Frontend:
- React.js, TypeScript, JavaScript, HTML5, CSS3, Bootstrap, Ant Design, Responsive Web Design
- Backend:
- Node.js, NestJS, REST API Development, API Integration
- Database:
- MySQL, SQL Query Optimization
- Tools:
- Git, GitHub, Postman, VS Code, SQLyog, Swagger
- Concepts:
- Full Stack Development, ERP Development, Database Optimization, Responsive Web Design, RESTful API Development
- AI-Assisted Development Tools:
- Windsurf, Cursor AI, ChatGPT

PROFESSIONAL EXPERIENCE

Full Stack Developer

Schemax Export Techno Craft Pvt. Ltd | Visakhapatnam

July 2024 – Present

- Built and maintained a production ERP platform across 6+ business modules using React.js, TypeScript, NestJS, Node.js, and MySQL — supporting daily operations for procurement, production, logistics, finance, and sales teams.
- Designed and integrated REST APIs across 5 business domains (procurement, production, logistics, finance, sales), handling high-volume transactional data with optimized response times.
- Developed 25+ reusable React.js + Ant Design components, reducing average UI development time per feature and improving cross-module consistency.
- Optimized MySQL queries and schema design for large transactional datasets, reducing API response time.
- Implemented lot-wise and operation-wise production tracking, enabling end-to-end traceability across manufacturing workflows and reducing manual status-check effort for production teams.

- Participated in debugging, performance tuning, issue resolution, and production support activities.
- Developed role-based business modules for inventory management, procurement processing, production planning, and logistics tracking.
- Built fallback and recovery mechanisms in the ERP backend, ensuring zero data loss during unexpected system interruptions across live business transactions.
- Collaborated with stakeholders and cross-functional teams to gather requirements and deliver scalable business solutions.

EDUCATION

Government Polytechnic, Visakhapatnam

Apr 2018 - Mar 2021

Diploma in Mechanical Engineering | 84%

LANGUAGES

- English, Telugu, Hindi

REAL TIME PROJECT

Enterprise ERP System

Tech Stack Used: React.js, TypeScript, Node.js, NestJS, MySQL, Ant Design, REST APIs

- Architected a multi-module ERP platform from scratch covering procurement, production, inventory, logistics, quality control, and dispatch — deployed and used in live business operations.
- Developed backend APIs using NestJS and Node.js to support scalable business workflows.
- Reduced database query execution time by optimizing SQL joins and indexing strategies on tables with 10,000+ records.
- Implemented role-based access control (RBAC) across ERP modules, ensuring department-level data security for inventory, procurement, and finance workflows.
